The focus of this research is the analysis of the impact of planning constraints on the provision of housing. There remains a perception that planning is a major constraint on development and on the confidence to put in applications that will both meet a local authority's planning requirements and achieve a speedy outcome. There is also concern that there is evidence that the effectiveness of the planning system varies significantly between apparently similar authorities. Local planning authorities (LPAs) that appear similar, for

Make the move to DOCK

Improved reliability

DOCK's multi-threading capability allows Outlook to handle document processing in the background, providing improved uploading whilst maintaining responsiveness.

DOCK maintains a document upload queue allowing users to resume unfinished uploads from previous sessions.

About Tullynore Technologies

We are market leaders in the provision of document management software and consultancy services. Our range of purpose-built software solutions empower organizations to achieve unparalleled value through enterprise content management and search, eDiscovery, archiving and compliance.

Additional information is available at <u>http://www.tullynore.com</u>

Increased functionality

Manage folders and documents from multiple leading content management systems all from a single interface.

Document icons delivering real-time status to end users as actions are performed, for example, successful upload of documents created in offline mode following reconnection.

Drag and drop uploading of large files supported as a background task, allowing the users to continue working without having to wait.

Editing of document properties, updating existing documents, declaring documents as records and deletion of documents.

Creation of folders, classes, subsets, document and record libraries.

Ability to convert inbox emails to storable files.

Template deployment.

Reporting tools available.

Plugin compatibility

Microsoft SharePoint	S
Meridio	(hp
File System	Ģ

Improved performance

Refined paging system for handling large amounts of classes and folders.

Easily modify Outlook-supported file formats.

Integrated document authorization workflow.

Ability to preview documents using the Outlook preview window.

Enhanced document searching with a wide range of refinements.
